Code of Conduct

Assignment Description: As a team we have to create a Java application which is a recipe management app. This application should minimally meet the Basic Requirements and we aim to have at least a week before the deadline to implement extensions. As a team we will create an awesome project and have fun doing it :)

Target or ambition level: Our target is to achieve a grade between 8 and 9 (inclusive), in Quarter 2.

Planning: We are planning to have weekly team meetings, where we will communicate if we are absent. These include:

- **a.** TA meetings on *Fridays* at *14:45* in Drebbelweg PC-Hall 3
- **b.** Team meetings on *Monday* at *13:00* where we plan the next milestone and distribute the tasks

Communication: Outside of meetings in person, we will communicate on Whatsapp and Mattermost. On Whatsapp, we will ask general questions that we may have and we will use Mattermost to communicate with our TA, and when someone needs more help or you just want to do something together we can physically or digitally meet up to help each other.

Collaboration outside of the mandatory meetings: If necessary, extra meetings will be scheduled (preferably on Mondays) to catch up on any work that is still not complete.

Work quality:

a. **Readability:** When a task is done, *a minimum of two people should review* it. It will later be discussed in the meeting. The code should also be of high quality and contain *javadocs* and *no checkstyle* errors. We will use the same Checkstyle that was used in Introduction to Programming in the Quarter 1 and add anything else that we need.
   - **i.** **Commits:** The commit names should be short and specific. There should be a maximum of 3 changed files and 200 lines of Java code.
   - **ii.** **Branches:** Issues, branches and MRs for the same feature can have the same name and should correspond to each other.
   - **iii.** **GitLab features:** Each issue must have labels, assignees, time tracking, and a milestone assigned.

b. **Merging:** Before merging to the main branch, the code written in the separate branch should *compile* and *pass all the previous work quality specifications*. Before merging anything to the main branch, everyone should look at the changes made and send a comment on the MR. We will also assign *two people per merge request*.
   - i. If there has been 1 day without any activity on a feature branch, the person that notices will do the review themselves. Once a merge request is merged, it should also close a corresponding issue.

Decision-making: Unanimity is preferable, but if a bottleneck is reached, only *5 out of 6 votes* are necessary to pass a point, so as to move the discussion forward.
Broken agreements: If there is a valid reason for broken agreements, said team member needs to bring cookies to the next meeting and if there is no valid reason make sure you finish / fix your mistake. In case of repeated broken agreements, we shall escalate to problem resolution.
Problem resolution: When dealing with conflicts, our first step is to try and reach a consensus by ourselves. If this does not work well, we will approach our TA who will advise us on whether we need to escalate the matter to lecturers or other third-parties.

a. We will make decisions using a discussion method and if we don't reach a consensus by the end of the meeting time, then we will table it to do first thing in the next meeting. However, if after two meetings no progress is made, we will contact our TA.
b. If a team member is not following the Code of Conduct in terms of participation, we will first reach out to them to make sure everything is okay. If they continue to not participate, we will contact our TA and ask for advice on how to handle the situation. This includes, being late or missing multiple meetings, not contributing enough code, etc.

Planning chair & minute-taker

Week	Chair	Minute taker
2 (21.11.2025)	Simon de Graauw	Lorenzo Morixe
3 (28.11.2025)	Lorenzo Morixe	Simon de Graauw
4 (05.12.2025)	Vidhi Khakhar	Ioana Caprita
6 (18.12.2025)	Ioana Caprita	Vidhi Khakhar
7 (09.01.2026)	Wouter Stoop	Marijn Rutten
8 (16.01.2026)	Marijn Rutten	Wouter Stoop
9 (23.01.2026)	-	-

The above schedule can suffer modifications, but at a minimum, every member should be chair and minute-taker at least once. The roles for week 9 are to be decided.
